

## Business Central, Solution Architect Job Description

We are looking for an innovative solution architect to develop and implement systems architecture that will meet our clients' business needs. The solution architect's responsibilities include gathering requirements and functional specifications, assessing the current software systems in place to identify areas in need of improvement, and overseeing development teams.

You will be working with the senior executives of our clients to realign the company to a future state and to drive business performance improvement through the alignment of people, processes, and systems. This is a ground floor opportunity to work with true thought leaders in the food and beverage industry, supply chain planning, food safety, and ERP.

To be successful as a solution architect, you should be able to integrate any updated specifications and requirements into the systems architecture. An outstanding solution architect should be able to explain complex problems to management in layman's terms.

### **A Day in The Life Typically Includes:**

- Understand functionality and limitations of Microsoft D365 Business Central and/or Aptean's Food and Beverage ERP.
- Match client business needs to software functionality.
- Building and integrating information systems to meet the client requirements.
- Assessing the systems architecture currently in place and working with technical staff to recommend solutions to improve it.
- Resolving technical problems as they arise.
- Providing supervision and guidance to development teams.
- Continually researching current and emerging technologies and proposing changes where needed.
- Informing various stakeholders about any problems with the current technical solutions being implemented.
- Assessing the business impact that certain technical choices have.
- Providing updates to stakeholders on product development processes, costs, and budgets.

### **What You Will Need**

Basic Qualifications:

- Bachelor's degree in information technology, software engineering, computer science, or related field.
- Proven experience in engineering and software architecture design.
- Previous project management experience is advantageous.
- Sound knowledge of various operating systems and databases.
- Efficient communication skills.
- Strong organizational and leadership skills.
- Demonstrated problem solving skill set
- Excellent attention to detail, time management and organizational skills
- Strong interpersonal, negotiation and persuasive skills at all levels
- Self-driven continuous learning / positive mindset
- Strong MS Office Skills – Excel, PowerPoint, Word

### **What Will Put You Ahead?**

Preferred Qualifications:

- Experience with Microsoft D365 Business Central and/or Aptean's Food and Beverage ERP
- Participation in a large systems project such as an ERP implementation
- Food and Beverage Industry Experience
- Familiarity with MS project and/or Smartsheets

### **Adroit employees have:**

- A sense of passion, urgency, and individual self-motivated drive
- Continuous self-investment
- High degree of integrity – do the right thing
- Creativity – challenge the status quo
- Respect and Unity
- Humility – believe in something greater than ourselves

Adroit does not discriminate in employment opportunities or practices on the basis of race, color, creed, religion, sex, gender identity or expression, sexual orientation, national origin, genetics, disability, marital status, age, veteran status, protected veterans, military service obligation, citizenship status, individuals with disabilities, or any other characteristic protected by law applicable to the state in which you work.

## **Seniority Level**

Mid-level
