Results

DAIRY CHALLENGES. CONNECTED ERP SOLUTIONS.

1. Milk Intake & Quality Management

Capture and manage milk quality tests, components, and supplier performance at intake.

2. Batch & Production Management

Manage recipes, batching, yields, and co/by-products across multiple processing lines in real time.

3. Food Safety & Traceability

Ensure compliance and complete lot traceability from farm to finished product.

4. Cost & Margin Visibility

Track costs by product, plant, and channel to improve profitability and control waste.

5. Inventory & Shelf-Life Management

Control FEFO, expiration dates, and cold chain inventory to reduce spoilage and protect quality.

6. Order & Distribution Excellence

Optimize order accuracy, routing, and on-time delivery to meet customer and retail demands.

THE RESULT

Connect intake, production, quality, inventory, distribution, and financial performance in one dairy-specific ERP platform.

A DAIRY ERP PARTNER THAT UNDERSTANDS THE INDUSTRY

1. WHY ADROIT

DEEP DAIRY EXPERTISE

Proven experience across fluid milk, cheese, cultured products, butter, ice cream, and related dairy operations.

POWERED BY APTEAN FOOD & BEVERAGE ERP

Built on Microsoft Dynamics 365 Business Central and purpose-built for dairy manufacturers.

STRUCTURED FOR SUCCESS

Business process and solution design aligned to milk intake, quality, batching, yields, and cold-chain operations.

CONNECTED ECOSYSTEM

Reporting, automation, EDI, mobility, labeling, and hardware solutions connected around the dairy enterprise.

PARTNERSHIP THAT LASTS

Long-term support for implementation, adoption, optimization, and continuous improvement.

2. ADROIT VELOCITY IMPLEMENTATION ACCELERATOR

1. PLAN

Discover, assess, and define success together.

2. DESIGN

Map processes and design the right solution.

3. CONFIGURE

Configure, integrate, and prepare your solution.

4. VALIDATE

Test, validate, and ensure readiness for go-live.

5. OPERATE

Go live with confidence and drive continuous value.

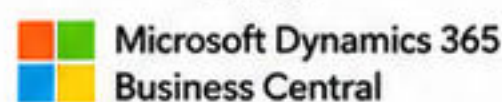

Adroit Velocity combines dairy-specific process design, AI-assisted requirements and testing, proven configuration standards, and experienced consultant validation to accelerate implementation while reducing risk and delivering faster time to value.

3. A CONNECTED SOLUTION FOR THE DAIRY ENTERPRISE

Food & Beverage ERP

Built on

DEMAND FORECASTING & PLANNING

Demand planning, sales forecasting, and S&OP alignment for dairy operations.

MILK INTAKE & SUPPLIER MANAGEMENT

Supplier management, milk receiving, quality tests, components, and inbound visibility.

RECIPE, BATCH & YIELD CONTROL

Formulations, batch records, standardization, co-/by-products, and yield tracking.

QUALITY, TRACEABILITY & COMPLIANCE

Lot traceability, allergens, HACCP support, recalls, and audit readiness.

INVENTORY, COLD CHAIN & WAREHOUSE

FEFO, shelf-life management, cold storage control, and accurate stock visibility.

ORDERS & DISTRIBUTION

Order management, picking, routing, delivery, EDI integration, and service levels.

FINANCIALS, COSTING & ANALYTICS

Real-time visibility into costs, margins, KPIs, plant performance, and profitability.

One ERP. Every function connected. Complete visibility. Better decisions. More profitable dairy operations.

LET'S BUILD A MORE PROFITABLE DAIRY OPERATION
