Proven
Results

PRODUCE CHALLENGES. CONNECTED ERP SOLUTIONS.

1. Lot & Harvest Traceability

Trace lots from grower, field, and harvest through packing and delivery.

2. Quality Control & Grading

Enforce grade standards, inspections, and pack outcomes in real time.

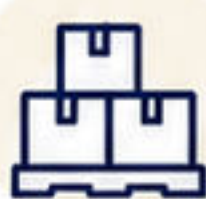

3. Cold Chain & Shelf Life

Track temperature, shelf life, and FEFO to reduce spoilage and waste.

4. Catch Weight & Pack Management

Manage variable weight, bins, pack sizes, and yield by lot.

5. Inventory & Availability

Real-time inventory by lot, location, and maturity to meet demand accurately.

6. Order & Distribution Visibility

Deliver on time with route planning, EDI, and proof of delivery.

THE RESULT

Connect every acre, bin, and delivery. Improve yield, reduce waste, meet food safety standards, and grow more profitable produce operations.

A PRODUCE ERP PARTNER THAT UNDERSTANDS THE INDUSTRY

1. WHY ADROIT

DEEP PRODUCE EXPERTISE

Proven experience across fresh produce packers, processors, and distributors managing perishability, quality, and compliance.

POWERED BY APTEAN FOOD & BEVERAGE ERP

Built on Microsoft Dynamics 365 Business Central and purpose-built for food and beverage manufacturers and distributors.

STRUCTURED FOR SUCCESS

Business process and solution design aligned to how produce operations manage lots, grades, packouts, and fulfillment.

CONNECTED ECOSYSTEM

Reporting, automation, EDI, mobility, labeling, hardware, and integration solutions connected across the enterprise.

PARTNERSHIP THAT LASTS

Long-term support for implementation, adoption, optimization, and continuous improvement.

2. ADROIT VELOCITY IMPLEMENTATION ACCELERATOR

1. PLAN

Discover, assess, and define success together.

2. DESIGN

Map processes and design the right solution.

3. CONFIGURE

Configure, integrate, and prepare your solution.

4. VALIDATE

Test, validate, and ensure readiness for go-live.

5. OPERATE

Go live with confidence and drive continuous value.

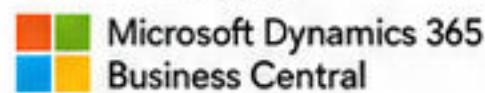

Adroit Velocity combines industry-specific process design, AI-assisted requirements and testing, proven configuration standards, and experienced consultant validation to accelerate implementation while reducing risk and delivering faster time to value.

3. A CONNECTED SOLUTION FOR THE PRODUCE ENTERPRISE

Food & Beverage ERP

Built on

FORECASTING & PLANNING

Demand planning, sales forecasting, and S&OP alignment for seasonal produce operations.

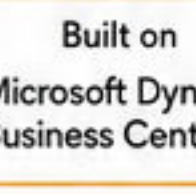

GROWER & PROCUREMENT MANAGEMENT

Grower, supplier, contract, inbound quality, and procurement management.

LOT, QUALITY & PACKHOUSE CONTROL

Lot tracking, grading, inspections, packout management, repacks, and yield visibility.

FOOD SAFETY, TRACEABILITY & COMPLIANCE

Farm-to-fork traceability, allergens, recalls, audit readiness, and food safety compliance.

INVENTORY, COLD CHAIN & WAREHOUSE MANAGEMENT

FEFO, shelf-life management, temperature-sensitive inventory, location control, and stock visibility.

ORDERS, DISTRIBUTION & LOGISTICS

Order management, routing, delivery, EDI, and proof of delivery across channels.

FINANCIALS, COSTING & ANALYTICS

Real-time visibility into costs, margins, KPIs, and operational performance.

One ERP. Every function connected. Complete visibility. Better decisions. More profitable produce operations.

LET'S BUILD A MORE PROFITABLE PRODUCE OPERATION
