PROTEIN CHALLENGES. CONNECTED ERP SOLUTIONS.

1. Catch Weight & Yield Management

Track variable-weight materials, yields, trim, and by-products with precision across every lot and production run.

2. Cut, Pack & Production Control

Monitor cutting, grinding, batching, packing, and labeling operations in real time.

3. Food Safety & Traceability

Trace allergens, lots, suppliers, and finished goods for compliance, audits, and recall readiness.

4. Cost & Margin Visibility

Understand raw material, labor, packaging, and overhead costs to protect profitability.

5. Inventory & Shelf-Life Management

Control FEFO, expiration dates, cold storage inventory, and product availability while reducing waste.

6. Order & Distribution Execution

Improve order accuracy, fulfillment, routing, and customer service across channels.

THE RESULT

Connect procurement, production, quality, inventory, distribution, and financial performance in one protein-specific ERP platform.
