**THE ADROIT DIFFERENCE**

One platform. Connected processes. Smarter decisions.

Connect data, workflows, people, and intelligence across your enterprise to drive efficiency, agility, and growth.

**Integration & APIs**

Connect ERP, WMS, scales, IoT, CRM, EDI, plant-floor systems, and partner platforms.

**Workflow Automation**

Use Business Central workflows and Power Automate to streamline approvals, alerts, and cross-platform processes.

**AI Prototyping**

Leverage Copilot, MCP tools, and rapid proof-of-concept development to validate use cases quickly.

**Copilot Studio Agents**

Create Business Central agents in Copilot Studio to streamline user assistance and task execution.

**Power BI & Analytics**

Turn operational data into dashboards, reporting, and actionable insights for better decisions.

Turn your ERP into a connected digital platform.

Adroit connects Microsoft Business Central with modern automation, AI, and analytics to help you operate smarter and move faster.

- ✓ Business Central Copilot Studio agent frameworks
- ✓ Rapid prototyping with Copilot and AI-assisted design
- ✓ Embedded Power BI dashboards and reporting
- ✓ Outlook, Teams, Excel, and cross-platform orchestration

Trusted digital capabilities for food manufacturers

Unify disconnected systems and workflows

Reduce manual work and improve responsiveness

Deliver scalable innovation with industry expertise

Ready to modernize your ERP ecosystem?

Let Adroit help you connect applications, automate workflows, and activate AI across your business.

ADROIT DIGITAL TRANSFORMATION

ADROIT MICROSOFT & BUSINESS CENTRAL AI ARCHITECTURE

ARCHITECTURE TAKEAWAY

Analyze in Fabric
Unify and model data for trusted insights.

Orchestrate in Copilot Studio / Foundry
Automate workflows and apply AI with agents and custom services.

Act through Business Central and connected systems
Drive operational outcomes across ERP, apps, and connected processes.

BUILT ON MICROSOFT. EXTENDED BY ADROIT.

- ✓ Unified data foundation with Microsoft Fabric and governed data products
- ✓ End-to-end orchestration with Power Platform, APIs, and agentic workflows
- ✓ Embedded AI with Microsoft 365 Copilot, Copilot Studio, and Azure AI Foundry
- ✓ Real-time insights with Power BI and real-time intelligence across operations
- ✓ Seamless integration across cloud and on-premises systems
- ✓ Designed for food manufacturing—scalable, secure, and audit-ready

OUTCOMES YOU CAN ACHIEVE

- ✓ Faster, more informed decisions with trusted, real-time data
- ✓ Automated processes that reduce manual work and errors
- ✓ Smarter supply chains, production, and quality outcomes
- ✓ Better collaboration across teams, plants, and partners
- ✓ Governed AI that drives innovation with confidence

ADROIT + APTEAN: STRONGER TOGETHER

Adroit is an authorized Aptean partner, helping food & beverage manufacturers extend Aptean Food & Beverage ERP and Microsoft Business Central with modern automation, analytics, and AI.
