TWO POWERFUL SOLUTIONS.

One connected outcome.

ADROIT FORECASTER

AI-powered demand forecasting built for food and beverage.

- ✓ Machine learning that gets smarter over time
- ✓ SKU-level demand forecasting with high accuracy
- ✓ Supports new products, seasonality & promotions
- ✓ Collaborative planning with what-if scenarios
- ✓ Seamless integration with Aptean Food & Beverage ERP / Microsoft Business Central

DYNAMIC REORDER POINTS

Intelligent inventory optimization based on real sales history.

- ✓ Automatically sets optimal reorder points
- ✓ Recommends minimum order quantities
- ✓ Adapts to demand variability & lead times
- ✓ Reduces stockouts, excess inventory & write-offs
- ✓ Driven by actual sales history and service level targets

INTEGRATED. AUTOMATED. ACTIONABLE.

Better plans. Better inventory. Better results.

Adroit Forecaster predicts what's coming next. Dynamic Reorder Points determines the right inventory levels to meet that demand—at the lowest possible cost.

- ✓ Improve service levels and customer satisfaction
- ✓ Reduce inventory investment and carrying costs
- ✓ Minimize waste and product write-offs
- ✓ Increase planning productivity and confidence
- ✓ Drive profitability through smarter decisions
